WASTE COLLECTION MADE EASY AND AUTOMATED

When leaving a container to be loaded of scrap material, construction residue, or other waste it is always a question of weight when the container has to be picked up, is the container within the legal road's overweight restrictions?

How much the customer should pay for the waste taken away?

For how close a weighing bridge can be, these are questions to be answered on the spot.

Installing a VEI scale makes these answers easy because the container can be weighed on the spot and it legal weight limit can be seen and therefore decided to load it or not.

The customer receives a printout with with the container gross weight and furthermore the data can be sent wireless in real time to vei web based payload monitoring ipotweb. com ready to be sent on the invoicing system.

A long process just to pick up a container becomes a short and productive procedure, the shortcut is VEI onboard weighing solutions.
